# TRADITIONAL CRAFTSMANSHIP

## The best of two worlds

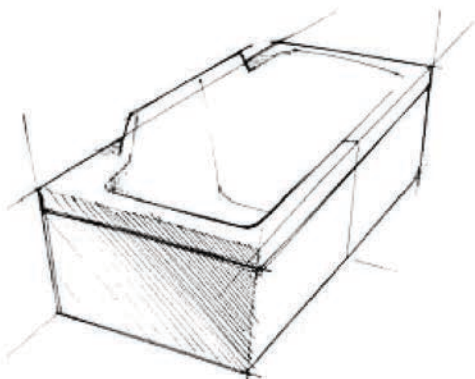

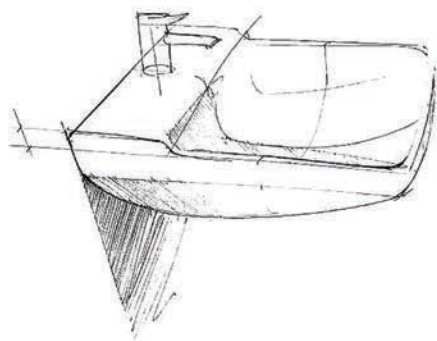

Ceramic is a natural product made from raw materials such as kaolin, quartz, feldspar or clay and therefore inherently unique. All bathroom ceramics are individually finished by hand before glazing

**SENSOWASH** SensoWash offers the most natural form of hygiene possible—cleansing with water. Stratoz has now introduced a new addition to its range of shower-toilet seats. SensoWash° Slim offers all of the advantages of a shower-toilet seat and is the perfect entry-level item for those who value purism and simplicity.

**TAILORED WASHING AREA** For users with special requirements, such as restricted mobility. Our washbasins and toilets, open up a wide variety of solutions which are both practical and elegant.

**COMFORTABLE BATHTUB EDGE** The comfortably wide edges of our bathtubs offer enough space for shampoos, soaps or candles which makes bathing even more relaxing. Bringing a modern day sanitary feel to your bathroom.

# INNOVATIVE TECHNOLOGY

# ABOUT US

The STRATOZ range of products are manufactured globally to European standards, incorporating the latest design trends and utilizing the most innovative technology and craftsmanship. Our extensive range covers all product categories relating to the bathroom and to complement each other we have created product families with matching sanitary ware, mixers, accessories and baths. The range encompasses value and quality across all levels enabling us to supply hotel and residential contracts as well as having a contemporary retail offer.

## Glittering self-cleaning glaze

Stratoz glittering glaze has the crystal cleaning advantages, the first-class quality material, as well as the industry-leading formula fully ensures the high compactness of the glaze and the cleaning crystallization. As dirt and water will not stain, the glaze is superior in the cleaning property, thus cleaning becomes easier.

## Large pipeline 3S Flushing

The completely new 50mm large draining pipeline of Stratoz toilet enables dirt to easily pass through. Meanwhile, the pipeline glazing technology is used, which greatly improves the draining and flushing effects of the toilet, effectively solves many problems such as blocking, cracking, leakage.
